

INFANT MASSAGE CERTIFICATION TRAINING

The Infant Massage USA® Program

- Brings knowledge into practice using the coaching method and reflective practice.
- Skills are implemented during three parent/baby sessions which are part of the training.

Students learn to model massage strokes using a doll while coaching parents with their babies.

- This encourages parent/infant communication to support infant and parent mental health.
- Gentle Movement activities are learned to enhance infant brain development.

Additional adaptations are learned to support parents with:

- babies with special needs
- babies born premature, (which support NIDCAP principles).
- their growing child
- babies who are fussy, gassy, or colicky

The Infant Massage USA® protocol can help:

- reduce stress for baby and parent
- reduce adverse childhood experiences (ACEs)
- help babies sleep better,
- stimulate early brain development.
- dads feel more connected.
